

Kant and Buddhism – Rare Kantianism

By Shomit Sirohi

I. Nature of Thought and Nature of Seed

The seed becomes a plant and like that the dialectical following of categories develops the forms of Kant – just compare then the elementary seeds that is some scripture in Buddhism and then develop the forms Kant, which means formal comparison to the small circles of details, like Nagarjuna reading, is a form which means that Buddhism is actually about reading and then form forms again, like a difference, that it is about reading, writing and drawing and studying flowers, or perhaps the nature of games and of flowers and daily life.

II. Rare papers in Kant

The paper is a form in Kant – which means paper and form – like a blank page which has formal writing becomes place and dialectic – that the place, is in fact with Japanese letters, or Chinese letters, or Hindi writing – such things are places like a house, and Buddhism is about Hindi and living at the house reading as a habit. Health is also covered at home, not at a hospital – perhaps in a health center and that then is Buddhism.

III. Kant and Buddhism

Rare, as Dalai Lama argues – rare things these Kantian writings with Buddhism, I know now a number of rare scriptures even Bibles and Qurans and Kabbalahs which then becomes this Kantianism, of the rare, which means simple rare impressions as a story of the form rare, spectacles and profundity is Buddhism, the one I like, but also comedy and tragedy as daily change and life – that in fact the rare things with ethics is Buddhism.

Nishida argues the rare Kant is about place, dialectic and formal stories of in fact studious type – simply brilliant that language in Prakrit is then a form in language which means language in Prakrit is then Buddhist scriptural language which becomes the formal reading and comparison – like an organic study of flowers and comparisons to a psychological condition – that he is flowery and delusional can mean he is fortunate or that he is too philosophical actually – he should just be spiritual instead – the story of Spiritual music as healing the philosophical men and women – the story Cornel West argues of spiritual black music listening as well.

Thank you, Nishida and Dalai Lama.
